

DEPARTMENT OF HEALTH
DIRECTORATE: RADIATION
CONTROL

DEFINITIONS: SUPERVISION

1. **SUPERVISION** – “the supervisor accepts and shares with the supervisee responsibility for ensuring that the supervisee’s work is professional and ethical, operating within whatever legal requirements (e.g. licence conditions) and organisational norms apply.”

- The supervisor is **not required** to be present at all times. However, the supervisor shall meet with the supervisee on a continuous and regular basis and review the assigned duties on a regular basis as appropriate to the tasks to be performed.

2. **DIRECT SUPERVISION** – “The supervisor provides on-site and in-view observation and guidance of a supervisee who performs an assigned activity.”

- The proximity of this supervision is such that immediate intervention is possible if problems occur.
